

Lahore:

In the lieu of series of training workshop, Seminars, and conferences, the Centre of Excellence in Water Resources Engineering has organized one day training workshop on “Extreme Event Analysis Through Remote Sensing Tools and Computer Models” on October, 03 2019. This workshop was aimed to provide understanding of Remote Sensing image processing techniques, software to process and extract useful information, and to demonstrate the potential of RS & GIS tools in assessment of extreme event.

The significant numbers of audience from academic, research organizations, representatives from national agencies e.g., planning, agriculture, and water has attended the workshop.

Dr. Umar Waqas Liaqat working as Remote Sensing and Water Expert at International Center for Agricultural Research in the Dry Areas (ICARDA) and Dr. Muhammad Waseem assistant Professor, CEWRE were the resource persons for the said one day workshop.

Prof. Dr. Noor Muhammad Khan, Director, CEWRE honored the starting session as chief guest and a detailed briefing was given to audience on the progress of various ongoing progress, with special reference to growth in academic disciplines, and series of training workshop, Seminars, and conferences

Prof. Dr. Tahir Izhar Dean Civil Engineering Department and Prof. Dr. Noor Muhammad Khan speaking at the concluding ceremony, underlined the need for close collaboration among educational institutions and Industry.

At the end of workshop, Prof. Dr. Tahir Izhar Dean Civil Engineering Department distributed the certificates and shield to participant and resource persons.
